Dear Friends,

As many of you know Kirk was diagnosed with end stage liver disease almost five years ago. According to his physicians at Mayo Clinic he needs a liver transplant. The priority for livers is highest for the sickest patients. His best chance to get a liver transplant is to receive a liver from a living donor. The remaining liver grows back in the donor and the part that is donated also grows to the size that is needed for Kirk. The donor evaluation process takes several steps, beginning with a questionnaire which can be done online or over the phone. Potential donors need to be between 21 and 59 years of age and in good general health. There are several subsets of blood types that would be compatible and that is best discussed with the transplant team.

We are aware that this is a huge decision to make and have struggled with making this request of anyone, however it has become clear to us that this is the only avenue for improved health and life for us.

Anyone who is interested in being a potential liver donor may go on-line to complete a donor screening at LivingDonorOrganTP@mayo.edu or they can call 866-227-1569 to talk to a nurse coordinator to complete the donor health screening questions. We have a limited amount of information that we would be happy to share with you as well.

Thank you for your consideration and blessings to you,

Kirk and Kathy Zongker
